

Sample PDF document

A free sample PDF from 99helpers.com/file-types/pdf. It is a small but realistic document: three A4 pages with the features most PDFs contain. Open the bookmarks panel in your PDF viewer to jump between sections.

What this file contains

- **Document information:** a title, author, subject and keywords your viewer shows under Properties.
- **Bookmarks:** an outline with one entry per section.
- **Embedded fonts:** subsets of DejaVu Sans, so the text looks the same on every device.
- **Real text:** you can select it, copy it and search it.
- **A table, a vector chart and a raster image.**
- **Links:** one to a web page and one to [a section further down](#).

Text and fonts

Text in a PDF is stored as character codes plus the font needed to draw them. This file embeds only the glyphs it uses (a font subset), which keeps it small. Because the fonts travel with the file, these characters render even on a device that has no such font installed:

English, Français, Deutsch, Español, Ελληνικά, Русский, Türkçe, Čeština: € £ ¥ © ° ± ×
÷ → ✓

Fonts in this file: DejaVu Sans and DejaVu Sans Bold, each embedded as a subset.

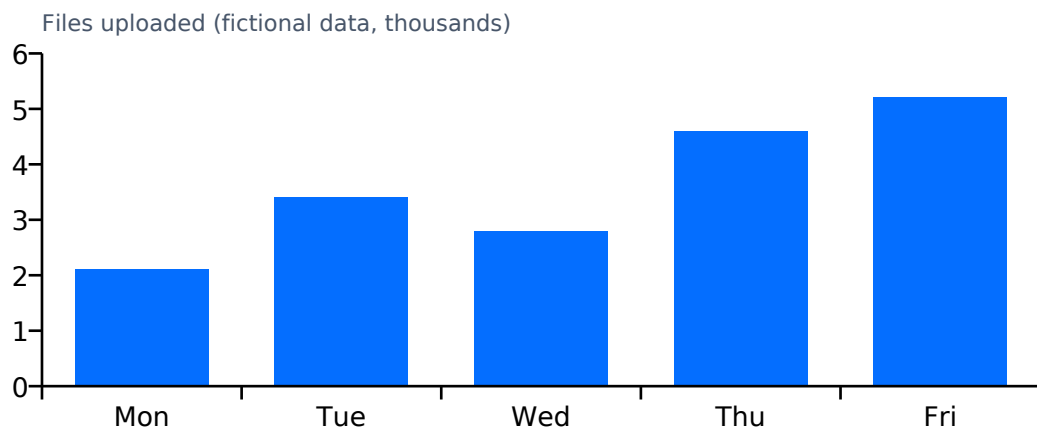

A table

PDF has no table object. A table is text and lines placed at exact positions, which is why copying a table out of a PDF often loses its columns. Tagged PDFs add a structure layer that marks up rows and cells; this one is not tagged.

Format	Extension	Typical use
PDF	.pdf	Fixed-layout documents
Word document	.docx	Editable documents
Plain text	.txt	Notes, logs, data
Markdown	.md	README files, docs

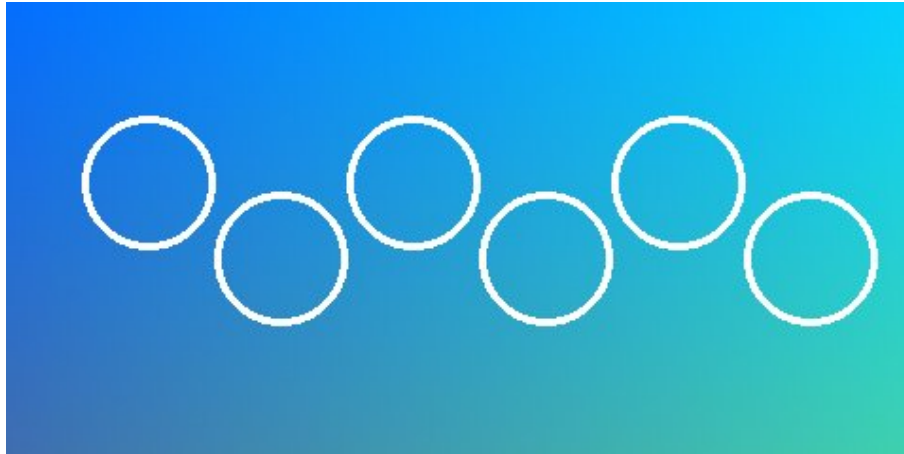

A vector chart

The chart below is drawn with PDF path operators (lines, rectangles and text), not stored as a picture. Zoom in as far as you like and its edges stay sharp.

A raster image

Photos and screenshots are stored as image objects. This one is a 480 × 240 pixel JPEG, embedded as it is (the PDF filter for JPEG data is called DCTDecode). Zoom in and you will see its pixels, unlike the chart.

Links

A link in a PDF is an annotation: a clickable rectangle on the page with an action. This one opens a web page: 99helpers.com/file-types/pdf. This one jumps [back to the first page](#).
